*“We make no compromises in matters of equipment longevity. Our eighteen-month warranty does not afford us the luxury of utilizing components, methods and materials based on cost alone.”*

Hank Miklich

Ron Jesse

the **BOSS III** is a dedicated 208/230 Volt spraying machine for medium size jobs. Its compactness and large hopper is common to all **BOSS** machines. It sprays 0-20 lbs. per min., over a distance of 200 ft. The fifth wheel is for side-movement. As with all **BOSS** machines its durability provides for long term low maintenance service.

*As with “the BOSS” line our field experience and innovative reputation commanded new technology—the subject: A serious 115Volt, 18Amp machine that is tough, productive, disassembles in minutes, and can be handled by one operator.*

*Continuing our tradition of high quality and low maintenance equipment we offer the perfect companion to “the BOSS”.*
